CHRISTUS SPOHN HEALTH SYSTEM | MEMORIAL CAMPUS

Corpus Christi, Texas

PROJECT DESCRIPTION

The Project will consist of a facility condition assessment of two separate hospital facilities in the area surrounding Corpus Christi, Texas. The assessments will include architectural and mechanical, electrical and plumbing (MEP) assessments of the facility both for general condition and repair, as well as compliance with hospital licensing rules. The assessment will also include a limited survey for Asbestos Containing Materials (ACM) and mold. A limited observation for possible accessibility issues will also be performed. Finally, a Phase 1 Environment Site Assessment is also included.

PROJECT SIZE

1,500,000 SF
