Medline Chicago Expansion

Project Services

Transwestern provided project management services for Medline's expansion in Chicago's Merchandise Mart. Executive Vice President and Managing Director David Graff and Vice President Marc Schwartz oversaw the delivery of the 110,000-square-foot expansion to its existing office space.

The project represented huge growth for the medical supply company as it nearly tripled Medline's space to 161,000 square feet. Graff and Schwartz, alongside Partners by Design, ECI, Spark-Chicago, BOS/Haworth, IMEG, Allen Visual, and Essco, worked to create an environment that would continue to encourage Medline's commitment to collaboration and provide space for its growing workforce. The extended office features stunning, open collaborative areas and optimizes its footprint in the iconic Merchandise Mart.

"This project embodies the next evolution of Medline's presence in Chicago," said Graff. "We're thrilled with the excellent teamwork with our partners, which enhanced Medline's continued trust in our services."

"As Medline continues to grow, the company is committed to ensuring it has the space needed for employees to thrive, collaborate and feel connected to the culture that has sustained us for years."
